#Four credits of internship, earned by a student during summer internship after 2<sup>nd</sup> semester or 4<sup>th</sup> semester, will be taken into account in 5<sup>th</sup> semester of a student who pursue 3year UG Programmes without taking exit option.

#### **Notes:**

- 1. Subjects, DSE, DSEC, SEC, AEC, MDC and VAC courses will be offered by the Department/ College/ Institute depending upon its available faculty, infrastructure and time table.
- 2. A student will opt for Multidisciplinary Course from the subject which is different from the discipline of major and minor subjects. Students are not allowed to choose or repeat courses already undergone at the higher secondary level (12th class) or opted as major and minor stream under this category. Provided further that if a Multidisciplinary Course across the discipline cannot be offered by the Department/Institute/College, due to its constraints and available resources, then
- i. MDC can be opted out of MOOCs through SWAYAM
- ii. MDC can be completed out of online courses offered by the Kurukshetra University
- iii. MDC can be completed from a cluster college, i.e., from a neighboring college/institute
- 3. A student will opt for AEC, SEC, VAC and Minor(Vocational) courses from the respective pools of courses offered by the Department/College/Institute duly approved by the University. A Department/Institute/College can add more courses in the pools of AEC, SEC, VAC and Vocational courses with prior approval of the university.
- 4. For first and second semester of UG programme (Multidisciplinary) (Scheme A and B), a student can choose a Minor Course of 2 credit from the pool of minor subjects in that semester offered by the Department/Institute/College.
- 5. For first and second semester of UG programme with Single Major (Scheme C), a student can choose a Minor Course of (4 credit), say Subject E, out of available Core Courses of that subject E offered in that semester.
- 6. From 3rd semester onwards of all three schemes, a student can choose a Minor Course, say Subject E, out of available Core Courses of that subject E offered in that semester.
- 7. In the subjects/courses which involve practicum, i.e. Practical/ Laboratory/ Studio/ Project/ Survey/Field work, etc., a course of 4 credits will dedicate 3 credits for lectures and one credit for practicum and in other subjects/courses, a course of 4 credits will dedicate 3 credits for

lectures and 1 credit for tutorial. During 4th year, when the practicum course is offered as a separate course in that subject, then a course of 4 credits will dedicate 3 credits for lectures and 1 credit for tutorial. However, for any DSE course, a course of 4 credits will dedicate 3 credits for lectures and one credit for tutorial.

- 8. In case of AEC of 2 credits, the entire 2 credits will be dedicated for lectures.
- 9. In the SEC courses of 3 credits, 2 credits will be dedicated for lectures and 1 credit for practicum, In the SEC courses of 2 credits, 1 credits will be dedicated for lecture and 1 credit for practicum and in the DSEC courses of 4 credits, 3 credits will be dedicated for lectures and 1 credit for practicum.
- 10. If a student takes exit after the second semester, then Undergraduate Certificate in Discipline/subject will be awarded after earning 52/48 credits including 4 credits for the internship of 4-6 weeks during the summer vacation. The nomenclature of the Discipline will depend upon the subjects opted during the programme. For example, if a student has studied two subjects Physics and Chemistry or Physics and Mathematics or Chemistry and Zoology, the Undergraduate Certificate in Physical Science and Life Science respectively will be awarded. Similarly, if a student has studied two subjects Economics and Sociology or Economics and Mathematics or Political Science and Hindi, the Undergraduate Certificate in Arts will be awarded.
- 11. If a student takes exit after the 4th semester, then Undergraduate Diploma in Discipline will be awarded after earning 96 credits including 4 credits for the internship of 4-6 weeks during the summer vacation. In case, a student takes exit after 2nd year of UG Programme with Single Major, then Undergraduate Diploma in Major Subject will be awarded after 100 credits (scheme B) and 94 credits (scheme C) including 4 credits for the internship of 4-6 weeks during the summer vacation.

# NOTE: $4^{TH}$ YEAR IS SAME FOR SCHEME A, B, AND C

#### **Notes:**

- 1. 4-year UG (Honours) or (Honours with Research) in Major Subject will be offered after completion of 3 year UG programme with one major and one minor subject to those students who have completed at least 60 credits in the concerned major subject. In addition to the above, 4- year UG (Honours with Research) in Major Subject will be offered only to those students who have obtained CGPA 7.5 or more in the 3 year UG programme.
- 2. Core course in Honours subject (CCH): Discipline specific elective course in Honours (DSE-H); Practicum Course in Honours subject (PC-H); Core Course in Minor Subject (CC-HM) of Honours Program.
- 3. Bachelor degree (Honours) or (Honours with Research) will be awarded in the Major subject after successful completion of the four year programme securing 184 credits and satisfying the minimum credit requirement as given in the Credit Table.
- 4. Student opting for Honours with Research will work on a Research Project or do research during the eighth semester. The dissertation work will be of 12 credits. 8 credits will be earmarked for the evaluation report of the dissertation and viva-voce examination will carry weightage of 4 credits.
- 5. The evaluation of the Dissertation and the conduct of viva-voce examination will be done by an external examiner.
- 6. The practicum course may be replaced by a theory course wherever not applicable.

# DETAILED SYLLABI FOR UG ECONOMICS COURSES FOR SEMESTER I, II, III & IV ONLY

# CC-1 MCC-1

|  | Session 2023-2024   |          |       |  |  |
|--|---|----------|-------|--|--|
|  | Part-A Introduction   |          |       |  |  |
| Subject  | Economics   |          |       |  |  |
| Semester   | I   |          |       |  |  |
| Name of the Course   | Micro Economics-I   |          |       |  |  |
| Course Code  | B23-ECO-101   |          |       |  |  |
| Course Type:<br>(CC/MCC/MDC/ CCM/<br>DSEC/VOC/DSE/PC/AEC/<br>VAC               | CC, MCC   |          |       |  |  |
| Level of the course (As per Annexure-I)  | 100-199   |          |       |  |  |
| Pre-requisite for the course (if any)  | N.A.  |          |       |  |  |
| Course Learning Outcomes (CLO)   | After completing this course, the learner will be able to:  1. Understand the nature and scope of Economics, including the meaning of Economics, its methods, and why it is studied.  2. Analyze the role of an Economist, including the ability to think like an Economist, the Economist as a Scientist, and as a Policy Adviser.  3. Evaluate the different types of economic activities and systems, including the organization of economic activities and the evolution of present economic systems.  4. Apply the concepts of demand and supply, elasticity, consumer equilibrium, production analysis, and cost and revenue analysis to real-world economic situations.  5*. |          |       |  |  |

|  | Part-B Contents of the Course   |          |       |  |  |

#### **Part-B Contents of the Course**

- 1. Nine Questions will be set in all and students will be required to attempt 5 questions.
- 2. Question No. 1 will be compulsory and will consist of 7 short answer type questions of 2 marks spread over the entire syllabus (2\*7=14 marks).
- 3. For the remaining four questions, students will attempt 1 out of 2 questions from each of the four units (14 marks each).

| Unit | Topics                                    | Contact Hours |
|------|---|---------------|
| I    | Nature and Scope of Economics:            |               |
|      | Meaning of Economics; Nature of           |               |
|      | Economics; Scope of Economics; Methods    |               |
|      | of Economics; Why Study Economics?        |               |
|      | Role of an Economist:                     | 12            |
|      | Thinking Like an Economist; The Economist |               |
|      | as Scientist; The Economist as Policy     |               |
|      | Adviser; Economic Policy                  |               |
|      | <b>Economic Activities and Systems:</b>   |               |

|                             | I =   | T              |
|-----------------------------|---|----------------|
|                             | Types of Economic Activities; Organisation    |                |
|                             | of Economic Activities; Evolution of the      |                |
|                             | Present Economic Systems                      |                |
| II                          | Firms and Household:                          |                |
|                             | Meaning of Firms and Household;               |                |
|                             | Relationship Between Firms and Household;     |                |
|                             | Input Markets; Output Markets; Circular       |                |
|                             | Flow of Economic Activities (Two – Sector)    |                |
|                             | Demand and Supply:                            |                |
|                             | Individual Demand; Market Demand; Law         |                |
|                             | of Demand; Types of Goods (Normal,            | 12             |
|                             | Inferior and Giffen); Demand Determinants;    |                |
|                             | Supply and its Determinants; Law of           |                |
|                             | Supply; Market Equilibrium                    |                |
| III                         | Elasticity and its Measurement:               |                |
|                             | Types of Elasticity of Demand and Supply;     |                |
|                             | Price, Income and Cross Elasticity;           |                |
|                             | Measurement of Elasticity of Demand;          |                |
|                             | Determinants of Elasticity of Demand          |                |
|                             | Consumer Equilibrium:                         |                |
|                             | Cardinal Utility Analysis (Law of             | 12             |
|                             | Diminishing Marginal Utility, Law of Equi-    | 12             |
|                             | Marginal Utility); Ordinal Utility Analysis   |                |
|                             | (Indifference Curve, Properties of            |                |
|                             |   |                |
|                             | Indifference Curve, Budget Line,              |                |
|                             | Equilibrium of Consumer); Consumer            |                |
| 11/                         | Surplus (Marshall & Hicks)                    |                |
| IV                          | Production Analysis:                          |                |
|                             | Production Function-Short Run and Long        |                |
|                             | Run; Total Product; Marginal Product;         |                |
|                             | Average Product; Law of Returns to Factor     |                |
|                             | (Law of Variable Proportions); Law of         |                |
|                             | Returns to Scale(Increasing, Decreasing and   |                |
|                             | Constant)                                     |                |

# DSEC-1

|   | Session 2023-2024   |           |       |
|---|---|-----------|-------|
|   | Part-A Introduction   |           |       |
| Subject   | Economics   |           |       |
| Semester  | II  |           |       |
| Name of the Course  | ECONOMIC SURVEY TECHNIQUES  |           |       |
| Course Code   | B23-ECO-203   |           |       |
| Course Type:<br>(CC/MCC/MDC/ CCM/<br>DSEC/VOC/DSE/PC/AEC/<br>VAC                              | DSEC  |           |       |
| Level of the course (As per Annexure-I)   | 100-199   |           |       |
| Pre-requisite for the course (if any)   | N.A.  |           |       |
| Course Learning Outcomes (CLO)  | After completing this course, the learner will be able to:  1. Have Insight of Basics of Data, Types of Data: Quantitative, Qualitative, Cross Sectional and Time Series, Different Scales of Measurement, Data Source: Primary & Secondary, Nature of Data in CSO, NSSO, Census and Economic Survey  2. Have understanding of concept of Survey Technique, Steps involved in conducting Survey, Methods used in collecting data through Survey, Types of Survey Research, Structured and Unstructured Questions in survey, Difficulties and Issues in Survey Research  3. Have knowledge about Questionnaire design, Various Qualitative Methods like Ethnography, Unstructured Interviews, Participant Observation, Recording of Data, Data Presentation and Computer Applications in Data Organization  4. To understand the Random and Non Random Sampling Techniques and Determination of Sample Size.  5*. To prepare a project report depicting their ability to collect and organize data |           |       |

|---|--|----------|-------|
| Part-A Introduction   |  |          |       |
| Subject   | Economics  |          |       |
| Semester  | II   |          |       |
| Name of the Course  | BASIC STATISTICS FOR ECONOM  | ICS      |       |
| Course Code   | B23-ECO-302  |          |       |
| Course Type: (CC/MCC/MDC/ CCM/<br>DSEC/VOC/DSE/PC/AEC/ VAC            | MCC  |          |       |
| Level of the course (As per Annexure-I)                               | 200-299  |          |       |
| Pre-requisite for the course (if any)                                 | N.A.   |          |       |
| Course Learning Outcomes (CLO)  | After completing this course, the learner will be able to:  1. Know the nature, scope, and uses of statistics in economics and be able to deal with data organization and presentation with different methods and with detailed knowledge of data presentation with different kinds of diagrams.  2. Able to analyze data with a deep understanding of the concepts of central tendency and dispersion of data with their different types and methods to help find out what the data want to say.  3. Understand the tentative change in data variables with the effects of changes in economic policy and also analyze the change in economic variables over different time periods.  4. Exhibit the estimation of the degree and direction of relationships between different economic variables and also help to find out the cause and effect relationship between the different economic variables  5*. |          |       |
| Credits   | Theory   | Tutorial | Total |

#### **Part-B Contents of the Course**

- 1. Nine Questions will be set in all and students will be required to attempt 5 questions.
- 2. Question No. 1 will be compulsory and will consist of 7 short answer type questions of 2 marks spread over the entire syllabus (2\*7=14 marks).
- 3. For the remaining four questions, students will attempt 1 out of 2 questions from each of the four units (14 marks each).

| Unit | Topics   | Contact Hours |
|------|--|---------------|
| Ι    | Nature, Scope and Uses of Statistics:            |               |
|      | Definition and scope of statistics; Subject      |               |
|      | matter of statistics, Importance and Limitations |               |
|      | of statistics in Economics; data                 |               |
|      | collection(census and sample method);            |               |
|      | Organization and Presentation of data(Textual    |               |
|      | and Tabular presentation of data,                | 15            |
|      | Diagrammatic presentation of data, Frequency     |               |
|      | diagram: Histogram, Polygon and Ogive            |               |
|      | curve)   |               |
| II   | Analysis of Data: Measures of Central            |               |
|      | tendency (meaning, purpose and function of       |               |
|      | Central tendency); Types of statistical          |               |

|                            | average(Arithmetic mean, median and mode)       | 15             |
|----------------------------|---|----------------|
|                            | Measures of dispersion(absolute measure         |                |
|                            | range, inter quartile range)                    |                |
| III                        | Index Number and Time Series Analysis:          |                |
|                            | Introduction of index number: purpose and       |                |
|                            | uses of index number in economics;              |                |
|                            | Calculation of price index and quantity index   |                |
|                            | (Laspyer, Pasche and Fisher index); Time        | 15             |
|                            | series: meaning and components of time          |                |
|                            | series; Model of analysis of time series        |                |
|                            | methods of measuring Trends and its             |                |
|                            | components.                                     |                |
| IV                         | Correlation and Regression Analysis:            |                |
|                            | Correlation: definition, types, degree and      |                |
|                            | methods; Scattered diagram; Karl Pearson and    | 15             |
|                            | Rank coefficient of correlation; Linear         |                |
|                            | regression analysis: meaning, types, regression |                |
|                            | lines, regression coefficient.                  |                |

| Course Learning Outcomes (CLO)  | After completing this course, the learner will be able to:  1. Define correlation, calculate, and interpret Pearson's and Spearman's correlation coefficients, understand their properties and limitations, differentiate between correlation and causation  2. Identify dependent and independent variables, formulate regression models, estimate, and interpret coefficients using ordinary least squares, assess goodness of fit using R-squared  3. Understand, solve, and apply the problems on probability  4. Understand and apply various theoretical distributions.  5*. |                   |        |  |
| Credits   | Theory   | Tutorial          | Total  |  |
|   | 03   | 1                 | 04     |  |
| Contact Hours   | 03   | 1                 | 04     |  |
| Max. Marks: 100<br>Internal Assessment Marks: 30<br>End Term Exam Marks: 70 | Time: 3 Hrs  |                   |        |  |

- 1. Nine Questions will be set in all and students will be required to attempt 5 questions.
- 2. Question No. 1 will be compulsory and will consist of 7 short answer type questions of 2 marks spread over the entire syllabus (2\*7=14marks).
- **3.** For the remaining four questions, students will attempt 1 out of 2 questions from each of the four units (14 marks each).

| Unit | Topics  | <b>Contact Hours</b> |
|------|---|----------------------|
| Ι    | Correlation Analysis:  Definition of correlation and its importance in economics, Types of correlation: positive, negative, and zero correlation. Methods of Studying Correlation: Scatter diagram method, Karl Pearson's coefficient of correlation (Covariance method), Two-way frequency table (Bivariate correlation method), Rank method, Concurrent deviations method; partial and Multiple Correlation (WITH 3 VARIABLES).   | 15                   |
| П    | Regression Analysis: Introduction to Regression Analysis: Definition and purpose of regression analysis in economics, Understanding the concept of a dependent variable and independent variable, Types of regression models: Simple and multiple linear regression. Estimating the regression coefficients: Ordinary Least Squares Method, Assessing the goodness of fit: Coefficient of determination (R-squared), Interpreting the regression coefficients and their significance. | 15                   |
| III  | Concept of Probability: Approaches to probability: Classical approach, Empirical approach, Axiomatic approach; Addition Theorem Of Probability; Multiplication  | 15                   |

|        | Theorem Of Probability: Independent and Dependent E      | vents; Bayes's       |                |
|--------|--|----------------------|----------------|
|        | Theorem (Rule for the Inverse Probability)               |                      |                |
| IV     | Random Variable:   |                      |                |
|        | Discrete And Continuous; Probability Distribution of     | a Discrete Random    |                |
|        | Variable; Mathematical Expectation; Binomial Distrib     | oution - Conditions, | 15             |
|        | Probability Function Of Binomial Distribution, Cons      | tants Of Bionomial   |                |
|        | Distribution; Poisson Distribution and its applicat      | ions; properties of  |                |
|        | Normal distribution and its applications.                |                      |                |
